

Petar Stoyanov

Junior Full-Stack Developer

WORKING EXPERIENCE

Akkodis Bulgaria Ltd.

Junior Full-Stack Developer

NOV 2021 - PRESENT

- Creating and maintaining of web pages and components by given template design in Figma on VueJS 2 using JavaScript, HTML, CSS and SASS.
- Integrating of external libraries such as: “vue-router”, “i18n” for translations, “vue-msal” for sign-in from active directories, “particles”, “axios”, “animate.css”, and others.
- I have personally created approx. 75% of the front-end on the app which I’m working on with the team.
- Creating new REST endpoints on the back-end using Java, Spring Framework, Spring Data JPA, Hibernate, and MySQL.
- Implementing and extending of the project business logic using Domain Driven Design and Hexagonal Architecture such as login, search, CRUD and etc.
- Contribution to the integration of external dependencies as: AWS S3, AWS translation, generating of PDF, PPT, and DOCX documents
- I have personally refactored 65% of the back-end and the database (with liquibase) in order to improve/optimize the performance.
- Part of the projects that implements Agile methodologies and Scrum practices
- I was promoted in my first year from Junior Back-End Developer to Junior Full-Stack Developer based on my personal results.

SoftUni

Evaluator of Student Web Application Projects

SEP 2021 - PRESENT

- This is an hourly second job, on a civilian contract.
- The work consists of being part of an examination committee that evaluates how a student has managed to create and implement a web application, based on pre-set criteria.

Enko Plastics Ltd.
